Accelerate strategy and value realization with AgilityHealth®
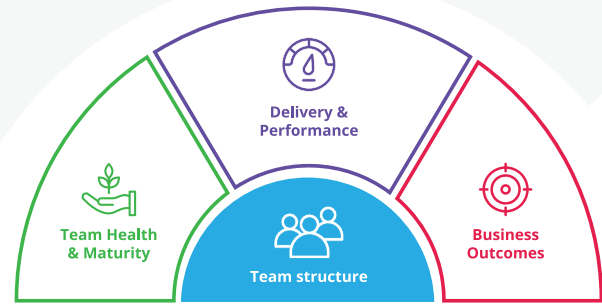

Discover the world's leading enterprise team management platform.
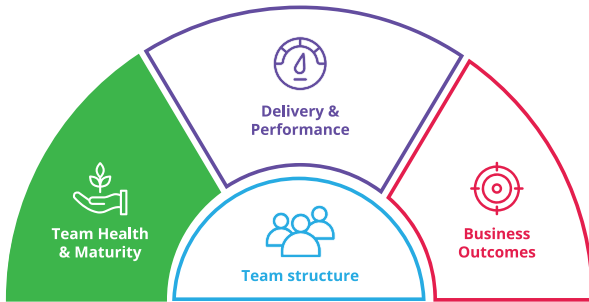

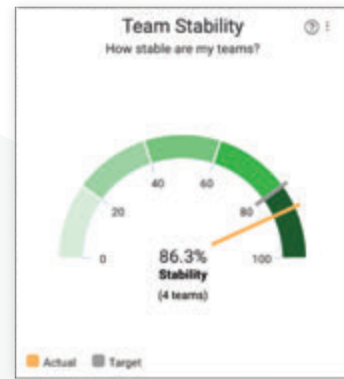

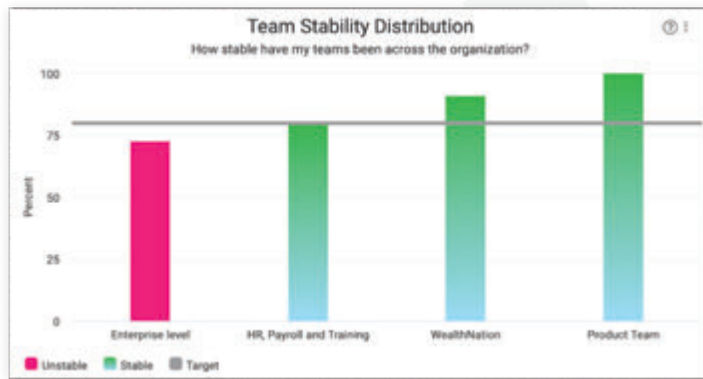

Metrics that Matter

Team Structure

Measure team stability and role allocation in addition to setting thresholds for the roles needed for each team.

AgilityHealth® leverages data across your organization to provide you with the source of truth for all of your teams. Through the Structural Agility Dashboard, you can visualize your cross-functional teams, manage allocation and stability, visualize team demographics, and identify role gaps.

Team Stability Distribution
How stable have my teams been across the organization?

Team Stability
How stable are my teams?

86.3%
Stability
(4 teams)

Team Health & Maturity

Understand the current state of the practices, behaviors, skills, and competencies of your team and benchmark results both within your company and across our database.
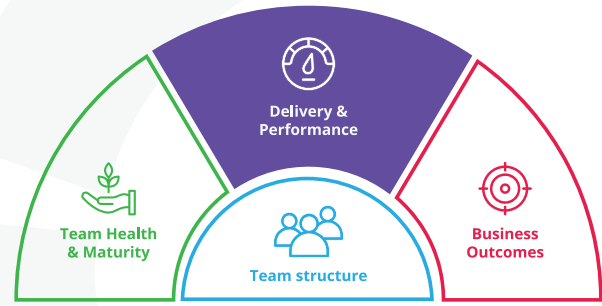

AgilityHealth® helps you measure team health and maturity through a series of assessments, empowering you to create a plan that will achieve improvement and alignment across your organization.

Delivery & Performance

Measure important quantitative metrics such as predictability, quality, and flow. Integrate with platforms such as JIRA.

AgilityHealth® streamlines the collection of metrics for multiple teams from your current work management platform, which allows a holistic overview into the performance across your organization, accelerating value realization as you recognize patterns in your data.
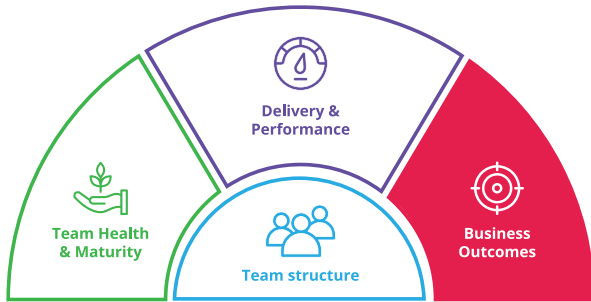

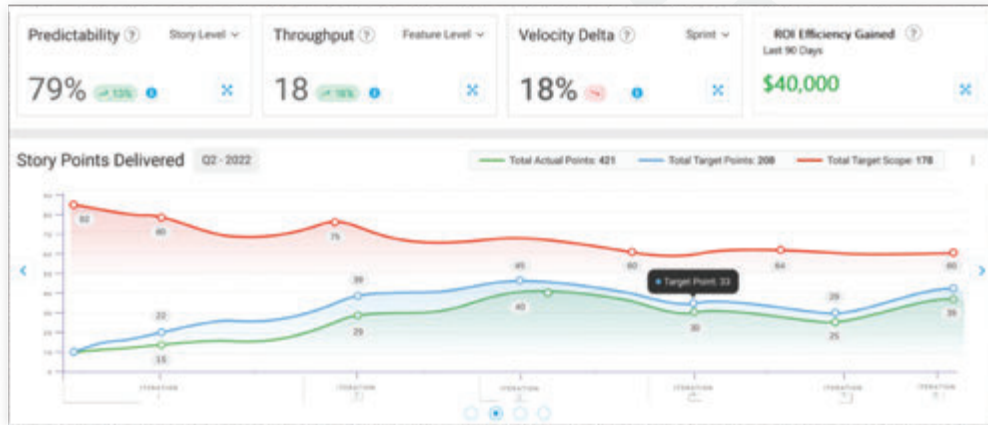

Business Outcomes

AgilityHealth® accelerates strategy to execution by ensuring alignment to measurable outcomes on all levels, visualized in the OKR format.

AgilityHealth® utilizes a collaborative approach that creates key results that matter across organizational teams, ensuring your team can execute on ambitious strategic goals better and faster.
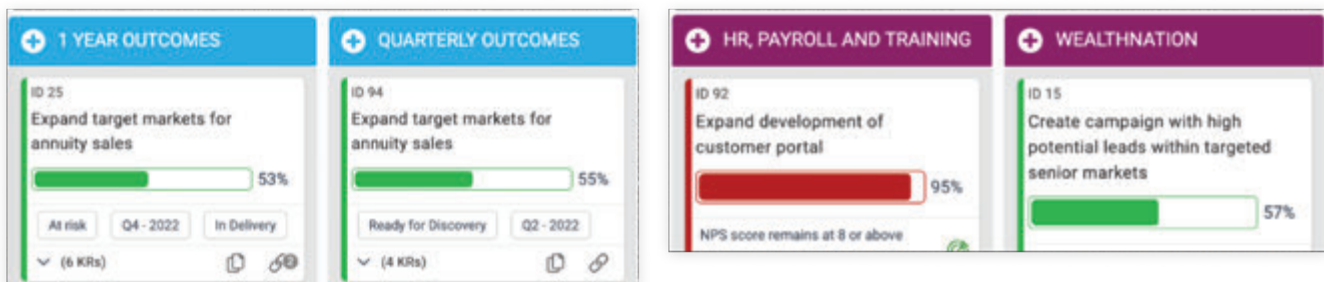

The 6 Capabilities of AgilityHealth®

Learn, Measure, Improve at Every Level

Develop Agile Talent
Grow internal roles through role-based skills radars and specific learning paths for teams and leaders.

Align Teams to Business Outcomes
Visually align your teams to measurable business outcomes, resolve outcome obstacles.

Leverage Actionable Insights
Enable learning about agile principles and business agility through short videos and short learning modules for all team and leader roles.
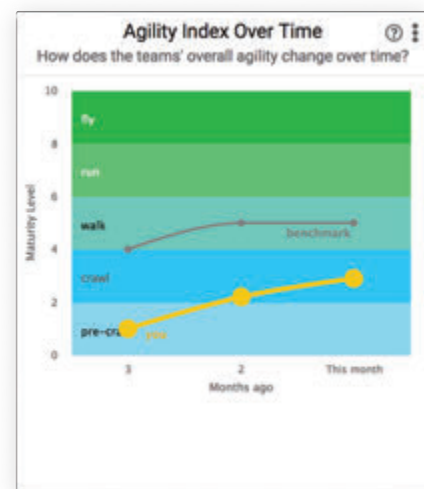

Visualize Your Team Structure
Create and visualize persistent teams, products, portfolios, and lines of business. Measure stability & allocation.

Measure Maturity & Performance
Assess both quantitative (flow, quality) and qualitative (practices and behaviors) data at all levels.

Manage Growth At Every Level
Systematically remove obstacles at the team, management, and senior leadership levels. Enable self learning and growth.

AgilityHealth® is the world's leading enterprise team management platform. With AgilityHealth® you can accelerate strategy and value realization, build high-performing teams, and leverage data and AI to drive continuous improvement on all levels.

Maturity Over Time
How does the teams' maturity change over time?

Performance Over Time

Metrics that Matter

AgilityHealth® uniquely combines Maturity, Performance, and Outcomes into one platform so you can leverage the data you need to build value-aligned teams that deliver better, faster outcomes.

Performance
Outputs (flow, quality, predictability)

Maturity
Practices & behaviors

Delivery & Performance

Outcomes/OKRs
Results & value delivered

Team Health & Maturity

Team structure

Business Outcomes

Measure   Improve   Accelerate

The Problem

Traditional Ways of Working are Ineffective and Inefficient

Ineffective strategy execution: strategy isn't aligned at all levels

Very expensive consulting models and not enough enablement.

Team structure is hierarchical. Teams are siloed with many handoffs.

Focus is on outputs and projects, not customer outcomes.

No metrics or too many metrics, not measuring what matters.

Leaders not engaged in removing obstacles across teams.

AgilityHealth® Solutions by Organizational Level

For Individuals

1- Assess current skills for key roles based on competencies

2- Develop individual growth plans with targeted recommendations
